Description

EN

The Nimbus Commuter 9 is built for all-season functionality, with a smart layout, exceptional performance, and signature Scandinavian styling. With a Cold Fusion White Mercury Verado V8-300 outboard, Nordic oak interior, and a spec designed to handle both leisure and commuting use, the C9 delivers comfort, control, and practicality in equal measure - plus a saving of almost £16,000 on the RRP. Finished in a white hull with a manual glass roof hatch and sun blinds, this model is as capable offshore as it is stylish in the marina. This 2025 model Nimbus Commuter 9 is on order with the factory but changes can still be made to the specification. Note - library photos may not reflect specification of boat.

Cabin: Inside, the cabin is finished in Nordic oak with beige carpets and cabin cushions. The galley includes cold water and an LPG gas cooktop, offering practicality for onboard meals. Extra portlights brighten the cabin space, while beige sand saloon cushions, aft side storage cushions, and a convertible bed arrangement add both comfort and flexibility. The Nimbus pillow set completes a warm, welcoming interior.

Cockpit: At the helm, a Simrad NSX 12" plotter delivers crystal-clear navigation, supported by a Simrad xSonic SS60 thru-hull sonar for accurate depth and seabed readings. A Simrad RS40 VHF with AIS receiver and antenna provides safe communication, making the C9 well-suited to coastal cruising or busy waterways. The helm layout is clean and ergonomic, putting essential information and controls at your fingertips.

Electronics: This model includes Nimbus Connect for remote monitoring and system integration. Onboard power and electronics are supported by the engine system and include the full Simrad suite for navigation, sonar, and communication. Additional convenience comes from black-water overboard discharge.

Machinery: The C9 is powered by a Mercury Verado V8-300 XL outboard engine in Cold Fusion White, delivering strong, responsive performance backed by Active Trim and VesselView 403 for smart engine management. Manoeuvrability is enhanced by a Quick bow thruster and a Zipwake dynamic trim control system (450mm), giving you smooth handling and stability even at speed or in crosswinds. With a bow windlass for easy anchoring and the ability to handle long distances or short hops with ease, this boat is built to go the distance.
